- **MEET PO QUALITY REQUIREMENTS**
- **IMPLEMENTATION OF LEAN PRINCIPALS**
- **VALUE ADDED SUPPLIER**
- **MEET OR EXCEED CONTRACTURAL REQUIREMENTS**

APPROVED FORGING SUPPLIERS

FORGING SUPPLIER REQUIREMENTS

When providing forgings or forgings in an assembly, suppliers shall utilize only the forging suppliers listed on the Purchaser's Approved Forging Supplier List.

A supplier utilizing a forging supplier other than one currently approved must submit a VIR to the Purchaser requesting approval of the selected forging supplier. An evaluation will be performed, the VIR answered, and, if satisfactory, the forging supplier will be added to the Approved Forging Supplier List.

In addition to, or in conjunction with, testing required elsewhere in the purchase orders, Suppliers shall invoke the following requirements on orders for forgings from an approved forging supplier:

Subsequent to forging (and heat treat if performed), material must be physically re-identified with a unique traceability identification to distinguish the revised properties from the original heat number traceability.

Obtain and test mechanical test samples as required in the purchase order, applicable material specification, modification for the material specification, and/or approved forging drawing. Test samples to be physically identified with the forging traceability number.

The forging supplier shall maintain the mechanical test specimens, and their respective test results, as objective quality evidence, subject to audit and further analysis by the Purchaser. Chemical and mechanical test report submittal to the Purchaser shall be in accordance with the requirements contained elsewhere in the Purchase Order.

The following link has the potential to identify additional approved Forging Suppliers that are not listed in this file. http://www.gdeb.com/suppliers/10_quality/Forging_Suppliers/
