TMS Overview

In a practical and detailed manner, the A3 Transportation Management System (TMS) addresses the fundamentals of the inbound and outbound shipment lifecycle. Designed for a multifaceted shipping environment, the system manages simple to complex scenarios involving multiple carriers, transportation modes, and PO/item numbers. Truckload (TL), less-than truckload (LTL) and Intermodal (IML) are supported by a single, centralized application. This manual will help you to get familiar with our TMS. This system does not cover FedEx and UPS shipments.

Every page of our TMS has a menu across the top of the screen with 5 tabs.

Home – The home tab takes you to the home page.

New Entry – The new entry tab allows you to enter a new shipment.

Search – The search tab lets you perform a shipment search by various categories.

Reports – The reports tab allows you to get different reports, for various purposes.

Exit – The exit tab lets you sign off and exit the system.

System Sign – On

All authorized users will access the A3 Transportation Management website by going to www.a3tms.com

Once there, the user will need to enter a username and password and then click "Submit" or "Clear" to clear fields.

Shipment Management Center

Welcome to the A3 Freight Payment TMS website!

In this application, you can manage and ~~search your shipment~~ information and avoid extensive phone calls.

A login form with two input fields: 'Username' and 'Password'. Below the fields are two buttons: 'Submit' and 'Clear'. The entire form is enclosed in a red oval. The 'Submit' button is green with white text, and the 'Clear' button is white with a green border and green text.

Not a member? Click here to [request a Login](#).

* Required fields.

Once you request initial access to the A3 Transportation Management system you will be asked to setup a company profile. This will include the following attributes:

- Company Name
- Address (or addresses)
- Hours of shipping operation
- Contact information
- Dock or loading area information
- Any other special information regarding your pickup location and process

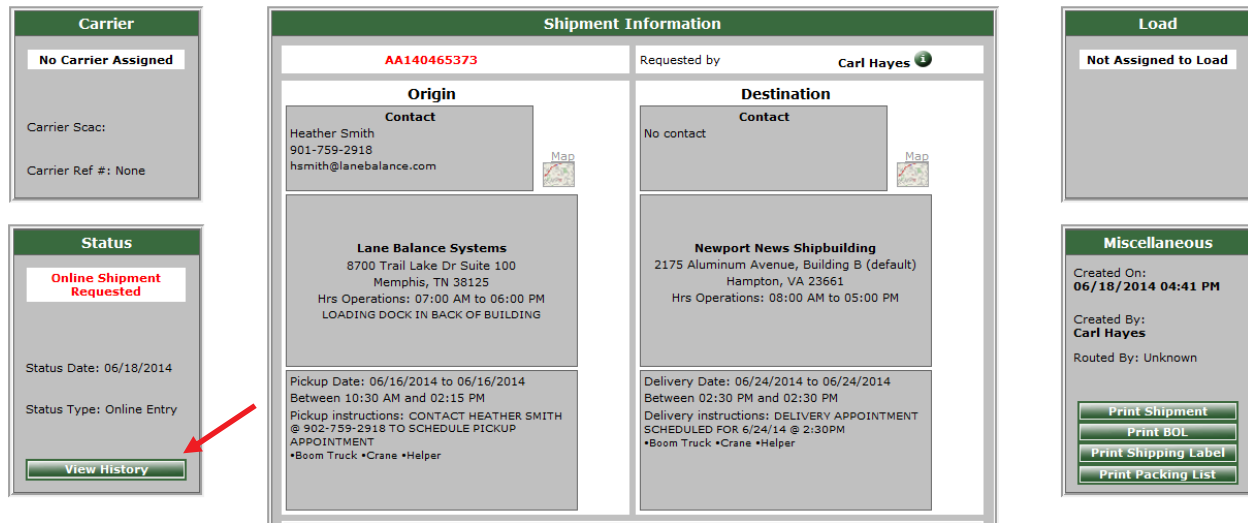

Search Shipment

Once the user has successfully logged in, the first screen to appear will be the search menu. This menu provides search capability on shipment numbers (AA#), carrier reference numbers, load numbers, bill of lading numbers, part numbers, PO and item numbers or charge to codes. Select the type of number to search and enter the number in the blank field provided. If searching multiple shipments, enter the data separated by a coma. Once all data is entered, click "Search Shipment". Shipments can also be searched by date range.

The screenshot shows a web interface with a green navigation bar at the top containing buttons for 'Home', 'New Entry', 'Search', 'Reports', and 'Exit'. Below this is a form titled 'Search a Shipment'. The form has a section for 'Search Type' with six radio button options: 'Shipment Number' (selected), 'Load Number', 'PO & Item#/Charge-To Code', 'Carrier Ref Number', 'Bill of Lading', and 'Part Number'. Below this is a 'Search Values' section with a yellow instruction box: 'You can enter either one or more item numbers for your search or a date range. Short date range will return faster, more accurate and more manageable results.' Underneath is a large text input field. At the bottom of the form, there is a 'Date Created' label, two date pickers, and a 'to' label. A green 'Search Shipment' button is at the bottom, with a red arrow pointing to it.

Shipment Status

To check the status of a shipment, simply search the shipment you need the status for and click on the View History button.

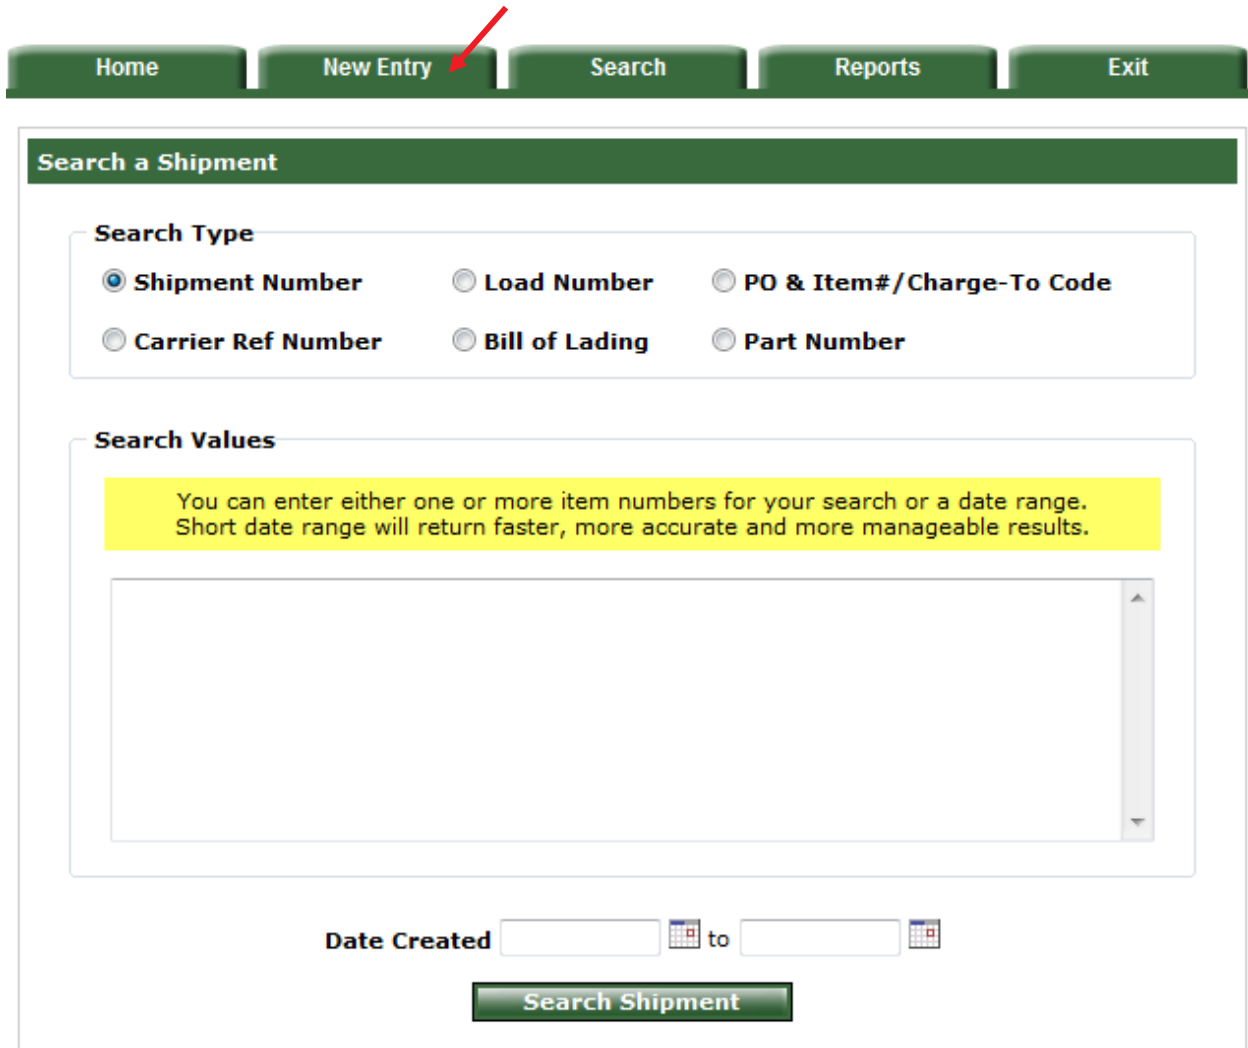

Once you have clicked on view history, you will see every shipment status message that has been entered for that shipment.

Shipment AA140619336 Status History					
Status	Status Date	Date Created	Status Type	Comment	
Online Shipment Requested	01/14/2014	01/14/2014 11:25 AM	Online Entry

New Entry

Select "New Entry" on the menu bar.

The screenshot shows a navigation menu bar with five items: Home, New Entry, Search, Reports, and Exit. A red arrow points to the 'New Entry' item. Below the menu bar is a form titled 'Search a Shipment'. The form has two main sections: 'Search Type' and 'Search Values'. The 'Search Type' section contains six radio button options: 'Shipment Number' (selected), 'Load Number', 'PO & Item#/Charge-To Code', 'Carrier Ref Number', 'Bill of Lading', and 'Part Number'. The 'Search Values' section contains a yellow instruction box: 'You can enter either one or more item numbers for your search or a date range. Short date range will return faster, more accurate and more manageable results.' Below this is a large text input field. At the bottom of the form, there is a 'Date Created' label followed by two date pickers separated by 'to', and a 'Search Shipment' button.

Once you click on Request Shipment, a pop up box will appear, click "OK" to proceed.

Once you click on OK, the "Shipment Entry System" display will appear confirming the new shipment along with the shipment number (AA#)

Shipment Entry System

The new shipment AA140465371 has been successfully inserted to our database and will be reviewed for approval by the Lane Balance team. You can start over and create a new shipment with new origin and destination information. You can also continue inserting a new shipment in our database by using the same origin information, or the same origin and same destination information as your previous shipment.

You also have the option to go to your newly created shipment's detail page.

Shipment Number: **AA140465371**
Date: 06/17/2014 11:36:06 AM
Origin: 8700 Trail Lake Dr Memphis, TN 38125
Destination: 4101 Washington Ave, Dock 15 Newport News, VA 23607

Online Shipment Approval Process

When someone outside of A3 Transportation Management enters (requests) a new shipment, the coordinators will get an alert. If all the details were provided, the coordinator will approve the shipment and begin arranging the shipment for transit. If all the details were not provided or incorrect information was provided, the coordinator will contact the requestor to obtain the corrections needed. If corrections cannot be obtained from the requestor, the coordinator will reject the shipment.

The coordinator will select the appropriate service level (expedite, ground, etc) and the appropriate transportation mode (LTL, TL, Flatbed, etc). Once complete, the coordinator will then select the appropriate carrier to use for transit. The coordinator will assign the carrier and the load tender (shipment confirmation), packing list, Bill of Lading and shipping label are sent to the requestor and the carrier via email or fax.

Suppliers must use the A3 Transportation Management shipping label unless they have received approval to use their own label from NNS. Shipping label requirements and approval process are noted in the NNS Freight Routing Guide located at http://supplier.huntingtoningalls.com/sourcing/res_shipping.html.

View Shipment

The main shipment information page is designed to view all details associated with a particular shipment. The layout lets you print shipment (the load tender), Bill of Lading (BOL), packing list and shipping label from this screen.

Reports

Click on reports and then choose the report you would like to run. There are 2 reports available; Manifest and Compliance.

Manifest Report - Select this report to see all outbound shipments from your specific pickup location(s) and/or all inbound shipments to your specific delivery location(s). Vendors/Suppliers can only view her own shipments.

Select the pickup/delivery location you want to run manifest report for from the drop down list. Once the location has been chosen, select the date range and click "Get Report."

A screenshot of the 'Manifest Report for 02/21/2014' form. The form includes radio buttons for 'Inbound' (selected) and 'Outbound'. It has a 'Company' dropdown menu set to 'CenturyLink NM' and a 'Location' dropdown menu set to '-- All --'. Below these are 'Date Range' fields with '02/01/2014' and '02/21/2014' and a 'Get Report' button. Red arrows point to the 'Location' dropdown and the 'Get Report' button.

Our system will then display all shipments with the specifications you chose. The user has the choice of exporting the details to an Excel spreadsheet by clicking "Export to Excel."
